Company Profile

A Digital Transformation Company

www.abudiinfotech.com

Hi There!

Abudi Infotech is a premier software development and IT consultancy firm with operations in Lusail, Qatar. We specialize in custom software development, AI-driven automation, and comprehensive digital transformation for businesses of all sizes. Through our strategic partnership with MBK Holding, we provide enterprise-grade technology solutions across the Middle East.

Our strategic partnership with MBK Holding, under the visionary leadership of Sheikh Mansoor bin Khalifa Al Thani, represents a powerful alliance committed to technological advancement and digital transformation.

**H.E. Sheikh Mansoor
Bin Khalifa Al Thani**

Welcome Message

Welcome to Abudi Infotech, where we turn complex challenges into intelligent, scalable digital solutions. From software engineering to AI-driven automation and strategic marketing, we are dedicated to helping businesses in the Middle East and beyond navigate the modern digital landscape. Whether you are looking to streamline operations or amplify your brand, you have found the right partner.

Abdul Razack

CEO, Founder

“At Abudi Infotech, our mission is built upon a foundation of integrity, innovation, and a deep commitment to our partners. We believe that technology should be more than just a tool—it should be the engine of growth for your organization. By combining technical expertise with a strategic, client-first approach, we ensure that every solution we deliver is not only robust but also perfectly aligned with your business goals. As we continue to scale our operations across the Middle East, our focus remains on providing superior quality and driving long-term value for every client we serve. Together, let us engineer a smarter, more efficient future for your enterprise.”

Vision & Mission

Vision

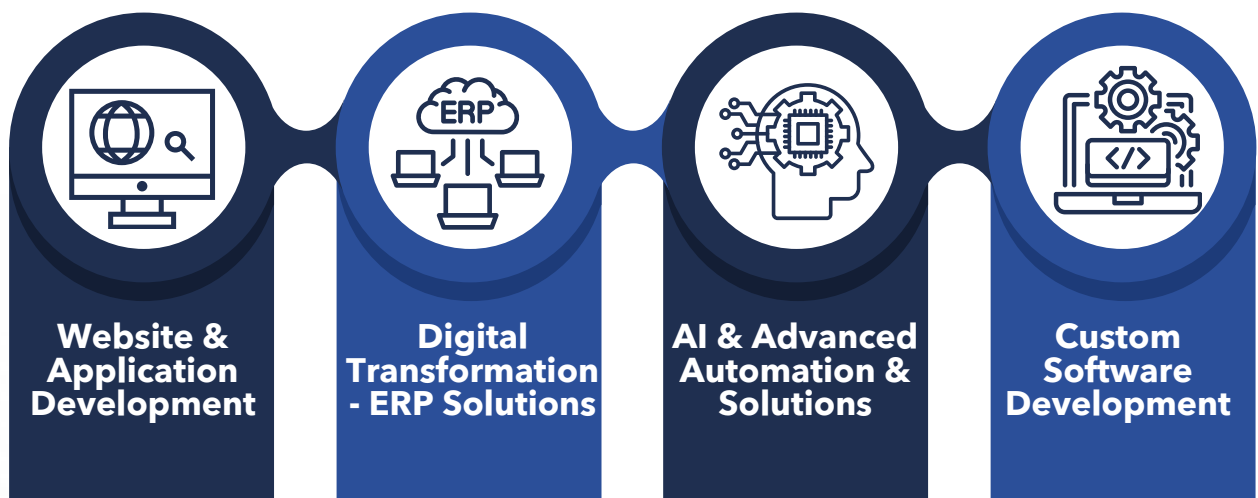

To be the most trusted technology partner for enterprises in the Middle East and India by building intelligent, scalable solutions that power the next generation of digital businesses.

Mission

To accelerate business growth through custom software, AI automation, and end-to-end digital transformation, helping enterprises modernize operations and unlock new revenue streams.

Our Services

We deliver comprehensive technology services tailored to meet your unique business needs:

- Website & Application Development: Engineering robust web and mobile applications tailored to specific operational needs.
- Digital Transformation: Modernizing business operations through ERP implementation and efficient system architectures.
- AI & Advanced Automation & Solutions: Delivering intelligent, data-driven solutions to optimize business performance.
- Custom Software Development: Tailor-made software solutions for your workflows

Our Proprietary Platforms

Digital identity and networking solution. It also serves as a 2-in-1 digital business and access card system.

AI & NLP online software suite that evaluates skills, behaviors, and 200+ competencies to assist with career counseling, hiring, and educational planning.

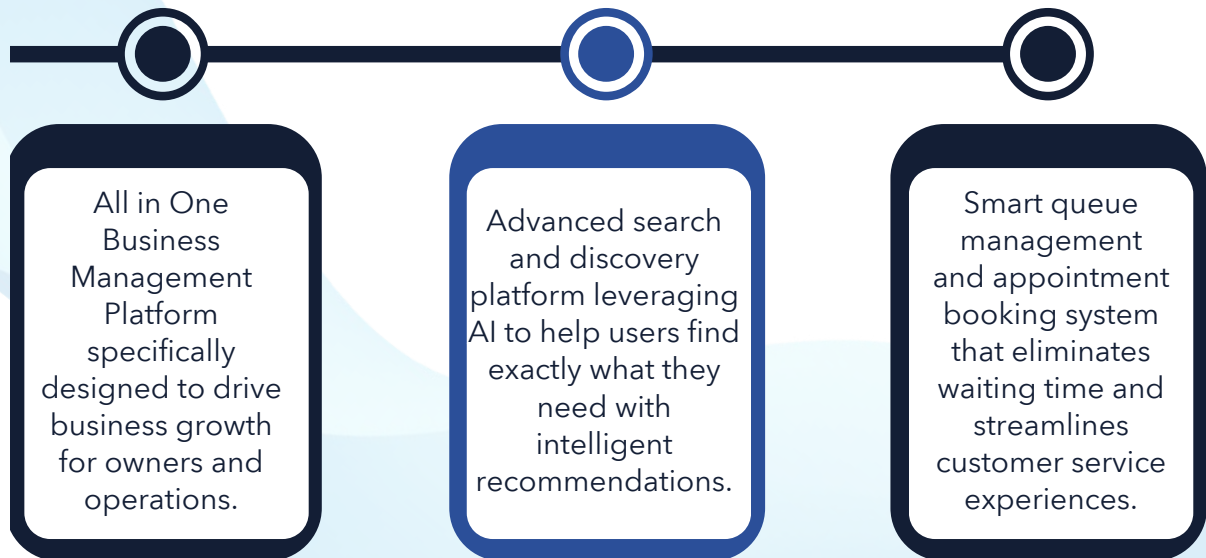

"All-in-One" AI workspace and autonomous AI agent platform. Slides, docs, images, video, code, and design – all in one place.

An automated financial operations system for precise cheque printing and record-keeping.

Comprehensive travel and voucher management platform offering seamless booking experiences and digital voucher solutions.

Comprehensive student safety and school communication platform that connects parents, teachers, and administrators in real-time.

Smart Visitor, Access & Parking Management Platform

Zuruni is a cloud-based platform that simplifies **appointment booking, visitor management, gate access, and parking operations** in one integrated solution. Designed for offices, hospitals, schools, government facilities, industrial sites, and other organizations, Zuruni enhances **security, efficiency, and visitor experience**.

KEY FEATURES

- **Appointment Management:** Easily schedule, approve, and manage visitor appointments.
- **Digital Visitor Management:** Register visitors, maintain searchable records, and monitor visitor activity.
- **QR-Based Access:** Generate secure digital visitor passes for faster and controlled entry.
- **Smart Gate Access:** Streamline entry and exit while enhancing facility security.
- **Parking Management:** Manage visitor and vehicle access efficiently.
- **Real-Time Dashboard:** Get centralized visibility into visitors, access activity, and operations.
- **Notifications & Alerts:** Keep employees and security teams informed when visitors arrive.
- **Reports & Analytics:** Access visitor history and operational insights for better decision-making.
- **Multi-Industry:** Suitable for **corporate offices, hospitals, schools, government facilities, industrial sites, logistics, hotels, and other organizations**.

BUSINESS VALUE

Zuruni reduces manual processes, strengthens access control, improves reception efficiency, and provides organizations with **real-time visibility and better control over their premises**.

Zuruni — Smarter Visits. Safer Access. Better Management.

Alert App

Smart Student Safety & School Communication Platform

Alert is a smart **student safety and school management solution** designed to provide schools, parents, teachers, and administrators with a connected platform for **real-time student monitoring, emergency alerts, communication, and safety management**.

The platform strengthens the connection between **schools and parents**, enabling faster communication and better visibility of student activities while helping educational institutions create a safer and more responsive environment.

KEY FEATURES

- **Student Safety Monitoring:** Enhanced visibility of student activities and safety.
- **Emergency Alerts:** Quickly notify relevant users during emergencies or critical situations.
- **Parent Notifications:** Keep parents informed about important student and school updates.
- **Real-Time Communication:** Enable faster communication between schools, teachers, students, and parents.
- **Student Information Management:** Maintain organized student records and essential information.
- **School-Wide Alerts:** Distribute important announcements and notifications efficiently.
- **Centralized Management:** Provide administrators with better control and visibility through a unified platform.
- **Improved Response:** Help schools communicate and respond faster when safety concerns arise.

BUSINESS VALUE

Alert helps educational institutions improve **student safety, parent engagement, communication, and operational efficiency**, creating a more connected and secure school environment.

Alert — Connecting Schools. Protecting Students. Keeping Parents Informed.

Smart Cheque Printing & Management Solution

CheqPrint is a professional cheque printing and management software designed to simplify, automate, and secure cheque-related financial operations. It enables businesses to generate and print accurate, professional cheques directly from their systems, reducing manual work, errors, and administrative effort.

KEY FEATURES

- **Automated Cheque Printing:** Generate professional cheques quickly and accurately.
- **Easy Data Entry:** Simplifies the process of preparing cheque details.
- **Batch Printing:** Print multiple cheques efficiently in a single process.
- **Cheque Management:** Organize and manage cheque records systematically.
- **Professional Formatting:** Ensures consistent and properly aligned cheque printing.
- **Error Reduction:** Minimizes manual entry and printing errors.
- **Secure & Controlled:** Helps maintain better control over cheque-related information.
- **Time Saving:** Reduces repetitive administrative work and improves productivity.
- **Business Friendly:** Suitable for companies handling regular cheque payments.

BUSINESS VALUE

CheqPrint helps businesses reduce administrative workload, improve cheque accuracy, accelerate payment processing, and maintain better control over their cheque operations.

CheqPrint — Smarter Cheque Printing. Simpler Payment Management.

ComPAS Now

AI & NLP-Powered Competency Profiling, Assessment & Career Guidance

ComPAS Now™ is an **AI and Natural Language Processing (NLP)**-powered competency profiling and assessment platform that analyzes individual traits, converts them into measurable competencies, and matches them with **job profiles, career options, and organizational requirements**.

KEY FEATURES

- **AI & NLP-Powered Assessment**
- Competency Profiling & Mapping
- Career & Job Profile Matching
- Talent Identification
- Training Need Analysis
- Student & Professional Assessment
- Leadership & Workplace Assessment
- VAK Learning Style Analysis
- Customizable Job Profiles
- ISCO & NOS-Based Competency Mapping

APPLICATION AREAS

Corporate Recruitment | Schools & Colleges | Career Counselling | Professional Students | Leadership | Healthcare | Aviation | Industry

BUSINESS VALUE

Helps organizations **identify the right talent, reduce training and hiring costs, improve productivity**, and make competency-based decisions. For students and professionals, it provides **data-driven career direction based on competencies and potential**.

ComPAS Now — AI-Powered Insights. Competency-Driven Decisions. Better Futures.

Smart & Flexible Travel Solutions

Voyacher is a modern travel platform designed to make travel **more accessible, convenient, and financially flexible**. It connects travelers with travel services while introducing flexible payment options that make it easier for customers to plan and enjoy their journeys without the burden of paying the full cost upfront.

SMART & FLEXIBLE TRAVEL SOLUTION

Voyacher simplifies the travel experience by combining **travel planning, booking, and flexible payment solutions** into one convenient platform, helping customers travel with greater freedom and confidence.

KEY FEATURES

- **Fly Now, Pay Later:** Travel today with flexible payment options.
- **Easy Travel Booking:** Simplified access to travel services and bookings.
- **Flexible Payments:** Reduce the immediate financial burden of travel expenses.
- **Convenient Travel Planning:** Plan journeys with a smoother and more accessible experience.
- **Customer-Focused Experience:** Designed around convenience, flexibility, and affordability.
- **Travel Accessibility:** Makes international and domestic travel more achievable for a wider range of customers.

BUSINESS VALUE

Voyacher combines travel convenience with financial flexibility, helping customers **travel sooner, manage expenses better, and experience greater freedom in planning their journeys**.

Voyacher — Travel Now. Pay Flexibly. Explore More.

Wearable Technology & Digital Platform for Diabetes Management

GlucoBurn is an integrated wearable device and mobile application designed to help **prevent, manage, and potentially reverse the progression of Diabetes Mellitus (DM)** through targeted muscle activation and personalized metabolic support.

THE GLOBAL CHALLENGE

Diabetes affects **537 million people worldwide**, with approximately **one diabetes-related death every 5 seconds** and **\$966 billion in annual global healthcare expenditure**. Traditional diabetes management can cost **\$5,000–\$15,000 per patient annually**, creating significant financial, physical, and psychological burdens.

Qatar: 24.6% prevalence | ~0.41M patients | **\$2B diabetes expenditure**

Jordan: ~1.09M potential patients (TAM)

THE GLUCOBURN SOLUTION

Wearable + Mobile App delivering targeted metabolic support. It is designed for use "Anywhere, Anytime, for Any Age."

- **52%** reported blood glucose reduction
- **30-minute session** with up to **6 hours** of metabolic improvement
- Specialized **electrical-stimulation version** for non-ambulatory patients
- Doctor-customized intensity, duration and follow-up
- Future integration with **gaming platforms**

TARGET USERS

Type 2 Diabetics | Pre-Diabetics | High-Risk Adults (25–65)

MARKET OPPORTUNITY

Positioned as a "**Blood Glucose Burner**" targeting the **\$237B global diabetes management market**, with expansion from **Qatar & Jordan to the US & EU by 2027**.

Heart Safe

Multi-Tiered Cardiac Monitoring & Smart AED Emergency Response

STRATEGIC VISION

Building on HIHealth's mission to reduce healthcare costs and burdens, Heart Safe expands home care from **chronic disease management to proactive cardiac safety**. Its consumer-friendly system integrates five key sensors to enable early detection and rapid community response, helping prevent sudden cardiac death.

1: Continuous Passive Monitoring (Heart Rate, SpO₂, & Temperature Sensors)

- **Mechanism:** A lightweight, non-invasive patch or wristband continuously monitors heart rate, SpO₂, and body temperature.
- **Purpose:** Establishes a personal health baseline and detects abnormal changes, triggering enhanced monitoring and rapid response.

2: Targeted High-Precision Diagnosis (Electrocardiogram - ECG)

- **Mechanism:** Automatically or manually activated, the device prompts the user to place their fingers on metal contacts to record an ECG.
- **Purpose:** Captures cardiac electrical activity and uses local AI to identify abnormal rhythms and potentially life-threatening cardiac events.

3. Integrated AED & Emergency Response Protocol

The true differentiator of the Heart Safe system is its automated transition from detection to active survival support:

1. **Immediate EMS Integration:** Automatically alerts emergency services during critical cardiac events, sharing the patient's GPS location and ECG data for faster response.
2. **Localized AED Sourcing:** Locates the nearest **Automated External Defibrillator (AED)** and alerts registered nearby volunteers to retrieve and deliver it to the patient.
